PROFESSIONAL SUMMARY

Results-driven Agentic AI developer with expertise in building collaborative AI agents, designing step-by-step reasoning and decision-making logic, and integrating AI systems with external tools and business systems.

EXPERIENCE

AI and LLM Integration Engineer — Tabsense AI-Mawdoo3 Mar 2025 - Present

- Designed and developed multi-market AI agents using CrewAI and Django, resulting in improved system efficiency
- Built a Text-to-SQL agent for automating natural language database queries, reducing query time by 30%
- Conducted continuous research on the latest advancements in AI and large language models (LLMs), applying new techniques to improve system performance

Azure AI Support Engineer — Microsoft Oct 2023 - June 2024

- Supported Azure AI products, including OpenAI on Azure, and developed automation scripts to validate customer configurations, reducing support time by 25%
- Communicated complex AI solutions clearly to customers and collaborated within a team of engineers to troubleshoot and resolve high-impact cases, achieving a 95% customer satisfaction rate
- Collaborated with a team of five to develop automation scripts, facilitating customer configuration validation for Securely using Azure OpenAI on Your Data

Junior Data Scientist — Qalam AI -Mawdoo3 July 2023 - Sep 2023

- Conducted text preprocessing in Arabic and English, and implemented NLP techniques including sentiment analysis, NER, and REGEX-based pattern search, achieving a 90% accuracy rate
- Worked in Agile environments using Jira for task management and Git/GitHub for version control, ensuring timely project delivery
- Gained hands-on experience with Linux (Ubuntu) and various command-line operations, improving system administration skills

Data Science Trainee — Estarta Solutions Mar 2023 - June 2023

- Conducted data cleaning and analysis for multiple demonstration projects using Power BI, ensuring accurate and reliable insights for decision-making
- Acquired proficiency in performing diverse tasks such as data querying and manipulation using SQL, improving data analysis skills
- Demonstrated competence in unsupervised learning techniques by implementing a project (Reduce Traffic Morality), employing Principal Component Analysis (PCA) and K-means clustering algorithms for data exploration

Estimation Engineer and Project Coordinator — Alaska Electromechanical Services June 2021 - June 2022

- Reviewed plans, specifications, and performed load calculations, designed duct systems, and took off HVAC, ensuring accurate project estimation
- Estimated cost and defined profit margins of projects, achieving a 10% increase in project profitability
- Communicated with customers to determine project scope and pricing information, ensuring customer satisfaction

EDUCATION

Data Science Coursework Nov 2022 - Jan 2023
Data Science Academy by Orange

Bachelor's Degree in Mechanical Engineering Sept 2015 - Aug 2019

SKILLS

Python · Machine Learning · LLM · AI agents · RAG · MLOPS · Postgresql · Azure Fundamentals · Azure AI Services · Big Data · PySpark · Deep Learning · AWS AI practitioner · Advanced Statistics · Natural Language Preprocessing · Crewai · Langchain · Pytorch · Fast API · Django · Linux · MLflow · Git · GitHub · CI/CD for ML · Docker · DVC · Microsoft Office
