PROFESSIONAL SUMMARY

Highly motivated and detail-oriented Senior Python Developer with a strong background in building and deploying web applications and APIs using Python, FastAPI, and related technologies. Proven experience in developing RESTful services, integrating machine learning models into production environments, and working with AI/ML technologies across the development lifecycle.

EXPERIENCE

Full stack Internship — Orange Coding School 02/2026 – Present

- Acquired hands-on experience in front-end development using HTML, CSS, Bootstrap, JavaScript to build responsive and user-friendly web interfaces.
- Gained practical experience in back-end development using ASP.NET MVC, developing scalable web applications following the Model-View-Controller (MVC) architectural pattern.
- Worked with Entity Framework and Entity Framework Migrations for database design, schema management, and data access, while utilizing SQL Server Management Studio (SSMS) and PostgreSQL for database administration and query optimization.

MLOps Internship — Qafza 10/2024 – 02/2025

- Designed and deployed end-to-end automated ML pipeline using Mage AI, covering data extraction, preprocessing, model training and deployment.
- Deployed NLP models to production using FastAPI, containerized with Docker for consistent and scalable inference.
- Implemented HuggingFace Transformer models for tokenization and inference across text classification tasks.

Machine Learning EMEA Support Engineer — Estarta Solutions (outsourced to Microsoft) 11/2023 – 06/2024

- Provided technical support for Azure AI Studio and Azure ML Studio to 100+ enterprise clients across the EMEA region.
- Resolved platform issues related to PromptFlow, AutoML, Model Catalog, endpoints, jobs, pipelines, and workspace assets.
- Maintained high customer satisfaction through solution-focused communication, consistently recognized by team leads for reliability.

Junior Data Scientist — Qistas 05/2023 – 11/2023

- Built a semantic search system using Elasticsearch to index and retrieve Arabic legal documents, improving retrieval accuracy for stakeholder teams.
- Developed a full Arabic NLP pipeline including text preprocessing, OpenAI API embedding, and topic modeling for domain-specific corpora.
- Created and maintained Power BI and Excel dashboards used by legal stakeholders for data-driven decision-making.

EDUCATION

Bachelor Of Artificial Intelligence 10/2018 – 06/2022

Al-Zaytoonah University
