

Ahmad Nabil Amireh

Data Scientist | AI Engineer

[Amman, Jordan](#) | +962 79 6939 457 | aamerh21@gmail.com | www.linkedin.com/in/ahmadnamireh

SUMMARY

Data Scientist and AI Engineer with hands-on experience in data analytics, AI, machine learning, Azure services, and Large Language Models (LLMs). Adept at developing data-driven solutions across various industries, with strong technical expertise in Python, MLOps, and cloud platforms. Recognized for strong problem-solving skills, effective teamwork, and consistently delivering high-quality results in fast-paced environments.

SKILLS

Soft Skills: Team Player, Communication Skills, Project Coordinator, Time Management, Problem Solving.

Technical Skills: Python, Machine Learning, LLM , AI agents, RAG, MLOPS ,Postgresql, Azure Fundamentals, Azure AI Services ,Big Data, PySpark, Deep Learning, AWS AI practitioner, Advanced Statistics, Natural Language Preprocessing, Crewai, Langchain, Pytorch, Fast API ,Django, Linux, MLflow, Git, GitHub, CI\CD for ML, Docker, DVC , Microsoft Office.

EDUCATION

Data Science Academy by Orange

Nov 2022 - Jan 2023

Completed over 360 hours of coursework focused on Data Science topics, including statistical data analysis, data visualization, machine learning, recommendation systems, and more.

Hashemite University

Sept 2015 - Aug 2019

Bachelor's Degree In Mechanical Engineering.

GPA (3.38/4.00)

EXPERIENCES

1- Tabsense AI-Mawdoo3, Amman.

Mar2025 – now

AI and LLM Integration Engineer

- Building multi-market AI agents using CrewAI and Django.
- Developing a Text-to-SQL agent for automating natural language database queries.
- Conducting continuous research on the latest advancements in AI and large language models (LLMs).

2- Vendor (Estarta Solutions) at Microsoft, Amman.

Oct 2023 – June 2024

Azure AI support Engineer

- Supported Azure AI products, including OpenAI on Azure, leveraging tools such as Kusto Query Language (KQL), Docker, Postman, and PowerShell.
- Developed **automation scripts** to validate customer configurations and streamline support processes.
- Communicated complex AI solutions clearly to customers and collaborated within a team of engineers to troubleshoot and resolve high-impact cases.
- Collaborated with a team of five to develop automation scripts, facilitating customer configuration validation for Securely use Azure OpenAI on Your Data.

3- Qalam AI -Mawdoo3 , Amman.

July 2023 - Sep 2023

Junior Data Scientist

- Conducted text preprocessing in Arabic and English, and implemented NLP techniques including sentiment analysis, NER, and REGEX-based pattern search.
- Worked in Agile environments using Jira for task management and Git/GitHub for version control.
- Gained hands-on experience with Linux (Ubuntu) and various command-line operations.

Data Science Trainee

- Conducted data cleaning and analysis for multiple demonstration projects using Power BI, ensuring accurate and reliable insights for decision-making.
- Undertook SQL training, acquiring proficiency in performing diverse tasks such as data querying and manipulation.
- Demonstrated competence in unsupervised learning techniques by implementing a project (Reduce Traffic Morality), employing Principal Component Analysis (PCA) and K-means clustering algorithms for data exploration.

Estimation Engineer and Project Coordinator

- Reviewed plans, specifications and Performed load calculations, designed duct systems and took off HVAC.
- Estimated cost and defining profits margins of projects.
- Communicated with customers to determine project scope and pricing information.
- Coordinated with other team members to ensure that all aspects of a project are considered when creating.

SAMPLE OF PROJECTS**End-to-end machine learning project (personal project).**

- Environment Setup: Built a complete development environment with all necessary packages and configuration files for seamless project execution.
- Pipeline Development: Designed and implemented an end-to-end pipeline encompassing data ingestion, validation, transformation, model training, evaluation, and prediction.
- Experiment Tracking: Integrated MLflow with DagsHub to monitor and track experiments.
- Deployment: Deployed the model using Docker containers, CI/CD pipelines, and a cloud provider.

Automation script for validating secure use of Azure OpenAI on your data.

- During my time at Microsoft, contributed to a script using both PowerShell and Python to help support engineers and users validate if their resources are correctly configured for the usage of Azure OpenAI on their data over a Virtual Network. "[GitHub - Azure OpenAI Validation Script](#)" – Official Repository-.

House Price Prediction Model

- During Data Science bootcamp at coding academy by orange, we worked at this project as a team using different Python libraries such as: Pandas, Scikit-learn, NumPy, Matplotlib, Seaborn, etc. and following the below steps:
 - Data Cleaning & EDA: Preprocessed the dataset and performed exploratory data analysis (EDA).
 - Feature Selection: Applied Backward Elimination and Lasso.
 - Modeling: Implemented Random Forest and Gradient Boosting algorithms.

CERTIFICATES

Microsoft Azure AI Fundamentals (AI-900) – Microsoft	June 2024
Microsoft Azure Fundamentals (AZ-900) – Microsoft	Apr 2024
Azure AI (Cognitive) Services Specialist – Cloud Academy	Oct 2023
Associate Data Scientist Certificate – Datacamp	Mar 2023

COURSES

Machine Learning in Production in Python – Datacamp (19 hours, 5 courses, 1 project)	Dec 2024
Big Data with PySpark – Datacamp (24 hours, 6 courses, 4 projects)	Oct 2024
Data Scientist with Python Career Track – Datacamp (97 hours, 25 courses)	Aug 2022
Learning AI From Zero To Proficiently – Unihance	May 2022
Python Basic to Advance – Edoxi Training Institute	Dec 2021

LANGUAGES

Arabic: (Native)	English: (IELTS Academic : Overall Score 7.5)	German: (Intermediate)
