

Farah Adel Masri

Junior MLOps Engineer

✉ farahhh.adel@gmail.com ☎ +962795487903 📍 Amman, Jordan 🔗 [in/farahhh-masri](#)

Summary

Junior MLOps / Full-Stack Developer with hands-on experience in building and deploying web applications and APIs using ASP.NET MVC, FastAPI and Python. Experienced in developing RESTful services, integrating machine learning models into production environments, and working with AI/ML technologies across the development lifecycle.

Experience

Full stack Internship, Orange Coding School 02/2026 – Present

- Acquired hands-on experience in front-end development using HTML, CSS, Bootstrap, JavaScript to build responsive and user-friendly web interfaces.
- Gained practical experience in back-end development using ASP.NET MVC, developing scalable web applications following the Model-View-Controller (MVC) architectural pattern.
- Worked with Entity Framework and Entity Framework Migrations for database design, schema management, and data access, while utilizing SQL Server Management Studio (SSMS) and PostgreSQL for database administration and query optimization.
- Implemented ASP.NET Identity for user authentication, authorization, role management, and secure access control within web applications.
- Developed interactive user experiences using SweetAlert2 and Toast Notifications for real-time feedback, validation messages, and enhanced application usability.
- Applied software development best practices by writing clean, maintainable, and scalable code, following coding standards, debugging techniques, and version control workflows.

MLOps Internship, Qafza 10/2024 – 02/2025

- Designed and deployed end-to-end automated ML pipeline using Mage AI, covering data extraction, preprocessing, model training and deployment.
- Deployed NLP models to production using FastAPI, containerized with Docker for consistent and scalable inference.
- Implemented HuggingFace Transformer models for tokenization and inference across text classification tasks.
- Tracked and compared ML experiments using MLflow, ensuring reproducible training and clear model versioning.

Machine Learning EMEA Support Engineer, 11/2023 – 06/2024

Estarta Solutions (outsourced to Microsoft)

- Provided technical support for Azure AI Studio and Azure ML Studio to 100+ enterprise clients across the EMEA region.
- Resolved platform issues related to PromptFlow, AutoML, Model Catalog, endpoints, jobs, pipelines, and workspace assets.
- Maintained high customer satisfaction through solution-focused communication, consistently recognized by team leads for reliability.
- Collaborated with cross-functional engineering teams to escalate and resolve complex, high-priority client issues.

Junior Data Scientist, *Qistas*

05/2023 – 11/2023

- Built a semantic search system using Elasticsearch to index and retrieve Arabic legal documents, improving retrieval accuracy for stakeholder teams.
- Developed a full Arabic NLP pipeline including text preprocessing, OpenAI API embedding, and topic modeling for domain-specific corpora.
- Created and maintained Power BI and Excel dashboards used by legal stakeholders for data-driven decision-making.
- Deployed ML models via FastAPI for internal data analysis and reporting services.

Data Science Trainee, *Orange Coding Academy*

11/2022 – 01/2023

360 hours of full-time practical course in machine learning algorithms, data science concepts and business professional skills.

Education

Bachelor Of Artificial Intelligence, *Al-Zaytoonah University*

10/2018 – 06/2022

GPA: 94.1

Projects

Gold Price Live Tracker [🔗](#)

- Built a fully responsive website, utilizing HTML, CSS, and JavaScript.
- Integrated a third-party API to fetch live gold market prices and automatically calculate prices for different gold purities (24K, 22K, 21K, 18K).
- Developed a real-time currency conversion feature enabling users to view gold prices in both **USD** and **JOD**.
- Implemented asynchronous data fetching using JavaScript and handled dynamic content updates without requiring page refreshes.
- Focused on responsive design, cross-browser compatibility, and user experience optimization to ensure accessibility across desktop and mobile devices.
- Strengthened skills in API integration, DOM manipulation, event handling, and front-end application development.

Personal Portfolio [🔗](#)

- Designed and developed a responsive personal portfolio website using HTML5 and CSS3.
- Created multiple sections to showcase personal information, technical skills, projects, education, and contact details in a structured and visually appealing manner.
- Applied responsive web design principles to ensure compatibility across desktop, tablet, and mobile devices.
- Utilized modern CSS techniques, including Flexbox and Grid layouts, to create a clean and user-friendly interface.
- Strengthened front-end development skills by implementing semantic HTML, reusable styling practices, and cross-browser compatibility standards.

News Classification [🔗](#)

- Built a containerized news classification application using the twitter-roberta-base-sentiment model from HuggingFace Transformers.
- Integrated FastAPI for model deployment and MLflow for experiment tracking, enabling reproducible training and easy iteration.
- Packaged the full application with Docker for consistent deployment across environments.

Customer Churn Prediction [🔗](#)

- Trained and benchmarked 3 machine learning models (Naive Bayes, Decision Tree, QDA) to predict customer churn probability.
- Applied SMOTE oversampling technique to handle class imbalance, improving minority class recall by a significant margin.

- Used tree-based feature selection to identify the top predictive features and reduce model complexity without sacrificing performance.

Skills

TECHNICAL

- OOP principles.
- HTML, CSS, JavaScript.
- ASP.NET MVC.
- PostgreSQL, SQL Server (SSMS), database design and querying.
- Python, NumPy, Pandas, Scikit-learn, Matplotlib, Seaborn, FastAPI.
- PyTorch, TensorFlow.
- Hugging Face Transformers, OpenAI API.
- Excel, Power BI.
- Docker, Mage AI.

SOFT

- Fast learner and highly adaptable
- Strong work ethic and accountability
- Problem-solving and analytical thinking
- Time management and attention to detail
- Ability to work independently and in teams

Languages

Arabic (mother language)

English

B2
