

Farah Adel Masri

Junior Data Scientist and Full-stack Enthusiast

📍 Amman, Jordan ✉ farahhh.adel@gmail.com ☎ +962795487903 🌐 in/farahhh-masri

SUMMARY

Data scientist with a solid background in data preprocessing, analysis and machine learning, including deep learning and fine-tuning. Experienced in deploying scalable solutions using Azure Machine Learning and APIs. Complemented by full-stack development skills in HTML, CSS, Bootstrap, and ASP.NET, allowing the development of complete, data-driven web applications from front end to back end.

EXPERIENCE

Fullstack Internship

Orange Coding School

Feb 2026 – Present

- Acquiring hands-on experience in front-end development tools using HTML, CSS, Bootstrap, JavaScript.
- Acquiring practical experience in back-end and database management using SSMS and Asp .NET.
- Enhancing professional and interpersonal skills.

MLOps Intern

Qafza

Oct 2024 – Feb 2025

- Designed and deployed end-to-end automated ML pipeline using Mage AI, covering data extraction, preprocessing, model training and deployment.
- Deployed NLP models to production using FastAPI, containerized with Docker for consistent and scalable inference.
- Implemented HuggingFace Transformer models for tokenization and inference across text classification tasks.
- Tracked and compared ML experiments using MLflow, ensuring reproducible training and clear model versioning.

Machine Learning EMEA Support Engineer

Estarta Solutions (outsourced to Microsoft)

Nov 2023 – Jun 2024

- Provided technical support for Azure AI Studio and Azure ML Studio to 100+ enterprise clients across the EMEA region.
- Resolved platform issues related to PromptFlow, AutoML, Model Catalog, endpoints, jobs, pipelines, and workspace assets.
- Maintained high customer satisfaction through solution-focused communication, consistently recognized by team leads for reliability.
- Collaborated with cross-functional engineering teams to escalate and resolve complex, high-priority client issues.

Junior Data Scientist

Qistas

May 2023 – Nov 2023

- Built a semantic search system using Elasticsearch to index and retrieve Arabic legal documents, improving retrieval accuracy for stakeholder teams.
- Developed a full Arabic NLP pipeline including text preprocessing, OpenAI API embedding, and topic modeling for domain-specific corpora.
- Created and maintained Power BI and Excel dashboards used by legal stakeholders for data-driven decision-making.
- Deployed ML models via FastAPI for internal data analysis and reporting services.

PROJECTS

Gold Price Live Tracker

- Created a personal portfolio during my internship in Orange using front-end tools only (HTML, CSS, Javascript) that fetches live gold price and display price for each karat, the user can also switch between USD and JOD.

Personal Protifolio

- Created a personal portfolio during my internship in Orange using front-end tools only (HTML, CSS).

News Classification

- Built a containerized news classification application using the twitter-roberta-base-sentiment model from HuggingFace Transformers.
- Integrated FastAPI for model deployment and MLflow for experiment tracking, enabling reproducible training and easy iteration.
- Packaged the full application with Docker for consistent deployment across environments.

Customer Churn Prediction

- Trained and benchmarked 3 machine learning models (Naive Bayes, Decision Tree, QDA) to predict customer churn probability.
- Applied SMOTE oversampling technique to handle class imbalance, improving minority class recall by a significant margin.
- Used tree-based feature selection to identify the top predictive features and reduce model complexity without sacrificing performance.

EDUCATION

Data Science Trainee

Nov 2022 – Jan 2023

Orange Coding Academy.

- 360 hours of full-time practical course in machine learning algorithms, data science concepts and business professional skills.

Bachelor Of Artificial Intelligence

Oct 2018 – Jun 2022

Al-Zaytoonah University.

- GPA: 94.1

SKILLS

TECHNICAL: Python, OOP, Numpy, Pandas, Matplotlib, Seaborn, Sklearn, Pytorch, Tensorflow, OpenAI, Transformers, FastAPI, Docker, Mage AI, SQL, Excel, Power BI, HTML, CSS, Javascript, Asp .NET.

SOFT: Team player, Hard worker, Fast learner.

LANGUAGES: Arabic (mother language), English (B2).
